Short bio

Dr Ramachandran Thiruvengadam

About 100 words

Dr Ramachandran Thiruvengadam is a physician-scientist and translational researcher with interests in the development and validation of biomarkers and AI-driven clinical decision tools for pregnancy outcomes. He is an Associate Professor at the Translational Health Science and Technology Institute, Department of Biotechnology, Government of India, and an investigator in the Interdisciplinary Group for Advanced Research on Birth Outcomes - DBT India Initiative (GARBH-Ini). As part of this programme, he has worked closely with multi-omics experts to discover novel biomarkers for preterm birth and other pregnancy outcomes.

About 200 words

Dr Ramachandran Thiruvengadam is a physician-scientist and Associate Professor in the Maternal and Child Health Programme at the BRIC-Translational Health Science and Technology Institute (THSTI), Department of Biotechnology, Government of India. He trained in paediatrics and biochemistry (DCH, M.D. at AIIMS New Delhi) and holds a Ph.D. in maternal and child health. His work develops and validates predictive and diagnostic tools and interventions to reduce adverse pregnancy outcomes such as preterm birth and fetal growth restriction. He is an investigator in the GARBH-Ini pregnancy cohort programme, where he works with multi-omics and data-science teams on biomarkers and AI-driven decision tools, and he has four Indian patent applications. During 2020-2023 he coordinated the clinical component of the DBT Consortium for COVID-19 Research. He is Principal Investigator of two ICMR National Health Research Priority projects, and Co-Principal Investigator of the ICMR GRASPP randomised trial and MOMI-India Phase II. He teaches epidemiology, clinical research and biostatistics, and serves as Academic Editor of PLOS Global Public Health and Associate Editor of Frontiers in Pediatrics.
